

U.S. Serial No. 10/601,171

Filing Date: June 23, 2003

**PROPOSED CLAIM AMENDMENT**  
**DRAFT**  
**FOR DISCUSSION PURPOSES**

61. (Currently Amended) A composition comprising an amount of an isolated monoclonal antibody effective to prevent prophylactically or therapeutically treat staphylococcal infection in neonates and a pharmaceutically acceptable carrier, wherein the antibody specifically binds to poly-glycerol phosphate of Lipoteichoic acid (LTA) of *Staphylococcus* Gram positive bacteria and is of the IgG isotype, wherein the antibody binds to and enhances opsonization of multiple serotypes of *Staphylococcus epidermidis*, coagulase negative staphylococci, *Staphylococcus aureus* and *Streptococcus mutans* by phagocytic cells with or without complement as compared to an appropriate control in an in vitro opsonization assay.

**DRAFT**  
**CONFIDENTIAL**  
**FOR DISCUSSION PURPOSES ONLY**  
**DO NOT ENTER**
